## ABOUT US

WindoorsTech - an organization that has built a strong reputation & holds excellent credibility for quality service. The group has emerged as a centre-of-excellence over an entire spectrum of touch-points, across industries.

We pride ourselves on being skilled and experienced in all aspects of our services and this, combined with our extensive knowledge, has established us as a major player in this industry.

WindoorsTech is a leading source of uPVC and aluminium windows & doors. We are marching ahead successfully, driven by the company's commitment to delivering innovation and excellence through the consistent application of this commitment and a decade of ethical business practices. We have earned unparalleled reputation for quality and reliability.

Sustainability at WindoorsTech is all about improving the health and well-being of individuals through green solutions. We are committed to developing, promoting and providing windows & doors solutions through our uPVC and aluminium architectural products for people across the country. We address this challenge with our Green Products and focus on Green Innovation.

## OUR MISSION

To grow together by involving each person of the team to provide architectural innovative quality product and services, to achieve customer satisfaction through cost effectiveness and best use of available resources, by adhering to our values, upgrading system and enhancing productivity through team work.

## OUR VISION

To become the most trusted preferred brand, through excellence in everything we do, and contribute our generous efforts in conserving our environmental beauty.

## WHY US?

- On Time Delivery
- Competitive Price
- Ethical Business Practices
- Excellent Services
- Extensive Research Work

## INFRASTRUCTURE

WindoorsTech has tremendous infrastructure to cater to the needs of its clients and projects, consistently, 24 X 7 & to undertake emerging developments in green design concepts, architecture, sustainable and alternative building technologies while catering to the requirements of architects, designers, structural engineers, builders, developers etc; and delivers modern building concepts which help them to improve the aesthetics, durability and functionality of their projects. The machinery used are imported from FOM Industrie Italy to give cutting edge clarity in our work.

## WindoorsTech is the authorised channel partner of

aluplast is one of the leading system providers of uPVC windows, doors, roller shutters and controlled domestic ventilation systems. The family-owned company headquartered in Karlsruhe (Germany) was founded in 1982 by Manfred J. Seitz. Today, aluplast has 24 production sites and sales offices all over the world.

aluplast is constantly working towards building a better world by producing energy efficient and environmentally safe products. Windows installed today will save on energy for at least the next 10-15 years and the offered window system with the suggested glass will achieve a combined U value of approx, 2.00 - 2.20 W/m<sup>2</sup>. deg. K, which is the lowest in this category.

It is worth mentioning that the U value of our system is only 1.60 W/m<sup>2</sup>. deg. K. IFT certificate confirming this and the acoustic certificate from IFT Rosenheim Germany are available with us.

### aluplast uPVC doors and windows - Unique Selling Proposition

- ❑ A German Window that is a Make in India initiative.
- ❑ Profiles conform to European Union Quality Standards and British Quality Standards.
- ❑ Profiles are designed to suit tropical climate.
- ❑ aluplast is the only company in India directly supplying from Germany.
- ❑ Maintenance free with 10 year warranty.
- ❑ Certification for being technically sound and appreciation throughout the world.
- ❑ Products are exported from India back to Germany and 18 different countries all over the world.
- ❑ Products are 100% lead-free and 100% recyclable. Use of co-extrusion TPI gasket technologies for best sealing properties in thermal and acoustics. Windows are fire-resistant and self-extinguishing in case of fire.

# SCHÜCO Aluminium the Finest Choice

Improvements to aesthetics and thermal performance differentiate today's aluminium products from those of the eighties and nineties. You only have to look around to notice that slim aluminium is fast becoming the product of choice for windows, doors and roofs.

## WindoorsTech is the authorized channel partner of Schueco

Schueco offers system solutions for windows, doors, façades, sliding systems, security technology and sun shading. In addition to these innovative products for residential and commercial buildings, the building envelope specialist offers consultation and digital solutions for all phases of a building project- from the initial idea through to design, fabrication and installation. Schueco India has partnered with chosen local fabricators throughout Pan India. The company has offices and exclusive showrooms in Delhi, Mumbai and Bangalore.

## What features should you look for in windows, doors and façades?

### SOUND Reduction

Home! It's where you are at ease, a calm environment that you are most relaxed in. To experience unmatched serenity, do it with Schueco's new-generation sound reduction windows and doors.

### PANORAMIC View

The Panorama sliding door systems offer an open and wide view of an extensive area. It's designed to accommodate the widest spans with the slimmest central interlock and completely concealed outer frames with the views beyond them.

### BURGLAR Resistant

Feeling secure is about the certainty that you are protected. Be it from the weather or burglars, Schueco systems ensure security in a concealed yet highly effective way. Schueco aluminium windows with the internal 'AvanTec SimplySmart' fitting provides a high level of basic protection that can be increased to resistance class 3 (RC3) with the help of additional locking points.

### SUSTAINABLE Materials

Aluminium can be recycled while wood can only be effectively carbon-neutral if not treated. Wood insulates well but needs regular maintenance while aluminium is maintenance free and when supplied with the correct level of insulation, can deliver impressive thermal performance.

### FIRE Resistant

Aluminium fire protection doors and screens don't depend solely on hinges, locks and closers but also on the glazing element. The interface between the framing and the wall is an important aspect which is often ignored. Schueco offers new-generation fire and smoke protection systems, simply well-conceived with extremely narrow face widths.

# HÖRMANN

## Steel Doors and Fire Doors

The Hörmann LX Series is a premium line of entrance doors that blend luxury, security, and modern design—ideal for upscale residential properties. These doors are crafted to enhance the aesthetic appeal of your home while providing robust protection.

**LX** | LUXURY  
DOOR  
RANGE

Ideal for main entrances, the LX Series doors make a grand statement, setting the tone for the elegance and security that lies within your home. Whether you're aiming for a classic or contemporary look, the LX doors effortlessly adapt to various architectural styles, making them the perfect choice for your homes.

TERMITE  
RESISTANT
